Experience

Product Associate July 2025 – Present
Tailnode *Gurugram, India*

- Own product execution across **4 B2B SaaS products** (survey admin, mobile collection, auditing, operations) running at **552K samples collected and 207K audited** monthly, peaking at **1,016 daily field agents**.
- Drive requirements for an **AI-assisted Survey Quality Control initiative**, defining validation workflows and quality criteria that catch survey-flow, logic, and consistency defects before deployment.
- Specified **and developed** the **Focused Question View for CATI surveys**: question navigation, skip logic, answer persistence across revisits, question-level timing, and failure states; owned QA, UAT, and release.
- Own data validation, **automated AI cleaning** (67K groups on a live workflow), weighting, reporting, and **client-facing APIs**; partner with Engineering on API behaviour, data models, and failure scenarios.
- Run **root-cause analysis** on production incidents using SQL, Google Analytics, and Firebase; contribute to Docker/CI-CD, API and regression testing, and release validation.

Projects

Survey Audio Intelligence & ML Audit Assist (Tailnode) | *Python, ASR, Speaker Diarization* 2026 – Present

- Building an evidence-first pipeline for Hindi/Hinglish survey audio: chunked speech recognition, speaker diarization, evidence extraction, and structured audit signals that prefill reviewer judgements rather than replace them.
- Designing evaluation around transcription error, speaker attribution, and critical-answer evidence; defining the confidence threshold required before a sample can skip human review.

Teaso Finance – AI Fintech Prototype | *Next.js, TypeScript, Python, LLM APIs* 2026

- Fintech education and decision-support prototype for first-time investors: SIP goal simulations, fund comparisons, and a source-grounded AI assistant with fallback handling, instrumented for calculator and AI engagement.

Wedding Experience Platform | *Next.js, TypeScript, Supabase* 2026 – Present

- Mobile-first consumer platform with tokenized per-guest invite links, guest segmentation, event-level access, RSVP workflows, and admin operations; data models designed to generalise across events and clients.

Product Operations Automation | *Google Apps Script, Google Sheets, Slack API* 2025 – 2026

- Eliminated a manual daily check-in via Apps Script and a Slack reminder bot; built an executive dashboard linked to the internal planning system summarising P0/P1 priorities and blockers.

Education

National Institute of Technology Karnataka, Surathkal Surathkal, Karnataka
B.Tech in Computer Science and Engineering *2021 – 2025*

Skills

Product: Product Management, Discovery, PRDs, Prioritization, Acceptance Criteria, Product Metrics, UAT, Release Management, Incident RCA
AI & Data: AI Product Development, LLM Workflows, MCP, AI Evaluation, ASR/Speech Pipelines, SQL, Google Analytics, Firebase, Funnel Analysis
Technical: Python, Next.js, TypeScript, REST APIs, Supabase, Git, Docker, CI/CD, Postman, QA & API Testing, Figma
